IDEAL BREASTS

There have never been more options for women considering cosmetic breast augmentation surgery.

Before and after photos of patients who have undergone this procedure with Dr Miroshnik. Results may vary from person to person.

Dr Miroshnik MBBS, FRACS (Plast.) is a highly qualified cosmetic plastic surgeon and a member of the ASPS and ASAPS. He is also the founder of Elixir - Elite Skin Care, www.elixir.com.au

There have never been more options for women considering cosmetic breast surgery. However, when it comes to achieving a beautiful, balanced and natural looking result-careful preoperative planning, implant selection and meticulous operative technique are key ingredients to success. Precise measurements are balanced with an artistic appreciation of the breast form, so that important decisions can be made about the appropriate implant, correct

technique, choice of incision as well as the breast pocket. Dr Miroshnik specialises in cosmetic surgical procedures of the breast, including breast augmentation, reduction, lifting as well as nipple reshaping. As well, Dr Miroshnik uses the latest techniques including dual planing, incision mapping and parenchymal modification to create natural looking and beautiful breasts that are in perfect harmony with each individual woman's body.
