TRIED & TESTED: THE ULTIMATE FOUNDATION CHALLENGE

BREAST AUGMENTATION

For some women, breasts may signify femininity, beauty and youthful vitality. For others, however, a lack of volume or shape may be a concern. Pregnancy, weight fluctuations or time itself may have changed the breasts of some women, which may affect confidence and self-image. Dr Miroshnik is a leading Sydney-based cosmetic plastic surgeon who specialises in and is renowned for his work on natural-looking breast augmentation. He uses the latest techniques to help produce beautiful results which continue to make him so highly sought after by Australian women.
