

BEGINNINGS: Cosmetic plastic surgery is a very precise, technically challenging and rapidly changing profession. I'm a perfectionist at heart, which suits it perfectly, and the ability to help people by making them feel good about themselves is extremely rewarding.

INSPIRATION: The ability to combine artistic expression with scientific calculation is a very gratifying experience. Plastic surgery combines these two disciplines on a daily basis. It is extremely rewarding to be able to transform the bodies and lives of my patients on a daily basis. I never cease to be amazed at the way in which a relatively simple surgical procedure can transform a person's entire life, better enabling them to live their life to the fullest.

EXPERTISE: I specialise in plastic surgery of the breast, namely augmentation (enlargement), lifting, reduction and/or complete reshaping. I have a passion for achieving the best, most aesthetic results possible. I also perform a lot of complete "mummy makeovers", tummy tucks and rhinoplasties.

TEAM: We have three very competent and lovely receptionists who ensure the smooth running of the practice. Kate is my practice manager, and she oversees the running of the Clinic and Medispa. She is also a registered nurse with a passion for injectables and sees a number of her own clients in this capacity, as well as assisting me with surgical aftercare. Kelly is our laser/dermal therapist. She provides most of the skin care consultations, laser and non-surgical treatments within the Practice. We also have a growing team of injecting nurses who provide non-surgical services such as facial rejuvenation.

Defining Qualities

Dr Michael Miroshnik's sleek, streamlined new clinic is a reflection of his aesthetic eye and outstanding body of work. He outlines the journey thus far with **Jennifer Teal**.
