

Actual breast augmentation patients of Dr Miroshnik. Results may vary from person to person.

IDEAL BREASTS

Dramatic changes have occurred in breast augmentation in recent years.

A woman's breasts signify femininity, beauty and youthful vitality. Breast augmentation can enhance confidence by creating a heavenly silhouette, says Dr Michael Miroshnik. Breast-augmentation surgery has advanced dramatically over the past 10 years. There have never been more options available for women considering the procedure, both in terms of the implants available and surgical techniques used.

Employing the latest techniques, such as dual-plane placement, and combining them with the largest range of available implants, including polyurethane-shelled (P-URE) implants, allows Dr Miroshnik to tailor each result precisely to each individual's needs. An important component of this is attention to key details such as a woman's body shape, lifestyle and personal goals. Careful pre-operative planning, precise implant selection and meticulous operative technique are employed in order to achieve the best possible results.

Although breast augmentation is Dr Miroshnik's specialty, his expertise extends to every area of breast surgery, including the correction of any number of cosmetic concerns, from breast lifts and reductions through to total reshaping. For anyone who may be looking to enhance or change any aspect of their breasts, now is the perfect time, with the recent launch of Dr Miroshnik's luxury clinic and medspa conveniently located in the heart of Bondi Junction.

Dr Michael Miroshnik is an industry-leading Sydney-based cosmetic plastic surgeon whose reputation for excellence in breast surgery is rapidly spreading throughout Australia and beyond. Dr Miroshnik is widely renowned for his exceptional surgical capabilities, as well as his enthusiasm and passion as an educator and expert in his field.

Suite 701, Level 7, 28 Spring Street, Bondi Junction NSW.
